Intake- and adjustment package 1 axle

€525,00

€433,88 excl. VAT

Every boat trailer, including a Vanclaes boat trailer, must be adjusted under the boat. Because otherwise the roller system may not work properly, the winch pole cannot stop the boat properly and a dangerous and illegal situation can arise if there is too high or too low a towball pressure. Putting the boat in the right position on to the trailer as well as adjusting the rollers, outriggers, bow support and axles and therewith the braking system is a crucial step towards a properly functioning boat trailer and is by far one of our most sold optional options / services.
