## Foreword

### The new standard

Your sailing pleasure and your boat; that's what Vanclaes is all about. The Vanclaes boat trailer was developed with your boat as the basic premise. Even at first glance, you immediately notice that a Vanclaes boat trailer has a totally different look. The design of a Vanclaes ensures that your cherished possession is not only better protected, but is also carried and transported in the same way as it is used to on the water. A new design, better operation and above all standard equipped with a stainless steel loading system and stainless steel chassis. That makes every Vanclaes unique.

Vanclaes has developed the ideal boat trailer based on user experiences, years of innovation at the drawing table and extensive testing at the waterfront. Vanclaes also offers an entirely new experience in the field of trailering. By using only top-quality materials, ingenious production methods and many innovations, trailering your boat finally becomes a worry-free experience.

I therefore would like to invite you to visit one of the Vanclaes dealers or the Vanclaes Experience Center in order to see this for yourself. Of course, you can get information, an overview of our prices or send any questions you may have on our website [www.vanclaes.com](http://www.vanclaes.com).

Our aim is to make one of your nicest experiences in life even nicer: to sail wherever and whenever you want!

## Vanclaes INFLATE < available SOON

### Pump it up ...

Transporting an inflatable boat without known losses through traffic seems easier than reality proves. The outboard motors heavy weight and additional pressure on the rubber boat, often causes damages to both the outboard motor and the boat. A loading system that supports the rubber tubes as well as the attached motor is crucial for protection. The Vanclaes Inflate ensures this key support for a safe and stable journey.

Now you can begin your travels, and your unforgettable memories on the water knowing that your boat is safe on your Vanclaes Inflate trailer. Starting from small trailers without restraint up to braked single or double axle trailers, the Vanclaes range offers a detailed line for inflatable's in their program.

Our website and the pricelist present a detailed overview of the Vanclaes Inflate product line.

Knowing the length, width and weight of your Inflatable boat makes the process of finding a suitable trailer in our product range very easy.

#### Each Vanclaes Inflate trailer is equipped with:

#### Options:

- Gyro-rollersystem
- Carpet Bunks
- Electric Winch

## ROAD REGATTA

When the competition goes further on the road...

Compatible trailers are available in many variations and sizes. However, Vanclaes now offer a completely new spectrum for boats and trailers with the introduction of the Vanclaes Dynamic Trolleys and Racks range. Their lightweight and functionality are closely linked to the Vanclaes trailer range.

Whether you want to transport one, two or three boats at a time, enjoy your journey with our Vanclaes Road Regatta range.

**TIP:** Our handy Vanclaes Dynamic Trolley Slider provides many features and the way to fast loading and unloading of your boat on the trailer.

## Standard Vanclaes Boat Trailers

### Stian Duijvelaar, talks about the Vanclaes Standard Boat Trailers:

"I need to have a positive gut feeling for the trailers leaving my company. A trailer is more than just a wagon underneath a boat. Every delivered trailer is in the best condition. We follow strict criteria and do not compromise concerning the quality, standards and reliability of our products that leave the factory with a full EU type approval. We frequently spot people struggling with their boat trailer, this results in amateurish behavior on the water or dangerous situations in traffic. Such sights belong in the past with a Vanclaes trailer!

Water sports stand for enjoyment and relaxation - starting the boating day or your vacation with stress kills the mood right away. Even if the route of transport leads only to the boat's winter mooring area, the journey should be a pleasurable and safe one. Please note that "being quick and hurrying to do something" increases the risk of accidents.

Towing with a Vanclaes trailer stands for towing with comfort and knowing that both you and your boat are safe and secure- you can be sure of that."

Stian Duijvelaar.

### Accurate setting up of your boat trailer

The purchase of a trailer can take place anywhere, however, true-to-size adjustment of boat and trailer is crucial. Every boat differs in form and has its own very specific characteristics. Even the most expensive trailers with stupendous transit systems offering all kind of accessories will be a problem without the correct technical preparation and might not serve for its intended purpose.

Taking the time to Adjust and secure your trailer correctly when loading the boat is strongly advisable, and required by the law. A wrongly selected boat trailer with an incorrect loaded position can lead to a serious accident.

Official controls and checks are often carried out by the Police and transport authorities to make sure this does not occur and to reduce accidents.

Our network of specialist suppliers can give you the required advice and carry out any necessary adjustments.

The importance of such settings is for the safety of both the towing vehicle and the trailer and to increase the user-friendliness of the trailer for all future journeys. Our suppliers can undertake this service for you. When purchasing a new Vanclaes trailer our suppliers can offer such information and advice of these settings.
